Career Objective

To build my career as a Software Engineer where I can apply my knowledge of programming, data structures and algorithms, web development, machine learning, and software development to solve real-world problems and continuously improve my technical skills.

Educational Background

Bachelor of Science in Computer Science and Engineering, 2023 to 2027 (Expected)

American International University-Bangladesh

- Major: Software Engineering
- Minor: Machine Learning
- CGPA: 3.46/4.00

Higher Secondary Certificate, GPA: 5.00/5.00

Gafargaon Govt. College, Gafargaon, Mymensingh

- Group: Science

Secondary School Certificate, GPA: 5.00/5.00

Gafargaon Islamia Govt. High School, Gafargaon, Mymensingh

- Group: Science

Academic Projects

Cafe Management System

Windows Forms Application using C#

- Developed a desktop-based cafe management system using C# Windows Forms.
- Implemented basic features for managing cafe operations and user interactions.
- Practiced form design, event handling, data management, and application logic.

Task & Project Management Tool

HTML, CSS, JavaScript, PHP

- Developed a web-based task and project management tool.
- Implemented features for organizing tasks and managing project-related activities.
- Practiced frontend design, backend scripting, and basic web application development.

Object Detection System

Microprocessor and Embedded System Course Project

- Developed an object detection system using Arduino, microcontroller, and sensors.
- Practiced sensor-based detection logic and basic embedded system operation.
- Gained practical understanding of hardware-software interaction.

Password Based Door Lock System

Microprocessor and Embedded System Course Project

- Developed a password-based door lock system using Arduino, keypad, servo motor, and LCD.
- Implemented password verification logic for access control.
- Practiced circuit design, input handling, and microcontroller-based system operation.

Research Work

AI-Driven Precision Medicine: Predicting Cancer Drug Response Using Pharmacogenomic Features and Machine Learning Models

Unpublished Research Work

- Worked on a machine learning-based research project focused on predicting cancer drug response using pharmacogenomic features.
- Explored the application of AI and machine learning models in medical data analysis and precision medicine.

Diabetes Prediction and Recommendation System Using Machine Learning

Unpublished Research Work

- Developed a machine learning-based system for diabetes prediction using health-related data.
- Worked with data preprocessing, model training, prediction, and recommendation-based decision support.

Skills

Programming Languages: C, C++, C#, Python, JavaScript, PHP

Web Development: HTML, CSS, JavaScript, PHP, ASP.NET Core

Database: SQL Server, Database Management

AI/ML Skills: Machine Learning Basics, Data Preprocessing, Model Training, Prediction, Python for Machine Learning

Tools and Platforms: Git, GitHub, Visual Studio

Core Technical Skills: Data Structures and Algorithms, Programming Fundamentals, Software Development, Problem Solving, Critical Thinking

Competitive Programming

- Solve programming problems on Codeforces and CodeChef.
- Developed strong analytical thinking and problem-solving skills through regular practice.
