

ABOUT ME

Computer Science and Engineering undergraduate focused on Software Engineering with a minor in AI/ML. Passionate about programming, data structures and algorithms, web development, machine learning, and software development. Interested in building practical solutions to real-world problems and continuously improving technical skills.

SKILLS

- **Programming**
  C, C++, C#, Python, JavaScript, PHP
- **Web**
  HTML, CSS, JavaScript, PHP, ASP.NET Core
- **Database**
  SQL Server, Database Management
- **AI/ML**
  Machine Learning Basics, Data Preprocessing, Model Training, Prediction, Python for ML
- **Tools**
  Git, GitHub, Visual Studio
- **Core Skills**
  Data Structures and Algorithms, Programming Fundamentals, Software Development, Problem Solving, Critical Thinking

COMPETITIVE PROGRAMMING

Regularly solve programming problems on Codeforces and CodeChef; strengthened analytical thinking and problem-solving skills.

JUNAYED ISLAM

CSE Undergraduate | Aspiring Software Engineer

CAREER OBJECTIVE

To build my career as a Software Engineer where I can apply my knowledge of programming, data structures and algorithms, web development, machine learning, and software development to solve real-world problems and continuously improve my technical skills.

EDUCATION

B.Sc. in Computer Science and Engineering — **2023 – 2027 (Expected)**
American International University-Bangladesh

- Major: Software Engineering
- Minor: Artificial Intelligence and Machine Learning

Higher Secondary Certificate
Gafargaon Govt. College, Gafargaon, Mymensingh
Group: Science | GPA: 5.00/5.00

Secondary School Certificate
Gafargaon Islamia Govt. High School, Gafargaon, Mymensingh
Group: Science | GPA: 5.00/5.00

PROJECTS

1. **Cafe Management System**
   C# Windows Forms application.
   - Developed a desktop-based cafe management system using C# Windows Forms.
   - Implemented basic features for managing cafe operations and user interactions.
   - Practiced form design, event handling, data management, and application logic.
2. **Task & Project Management Tool**
   HTML, CSS, JavaScript, PHP.
   - Developed a web-based task and project management tool.
   - Implemented features for organizing tasks and managing project-related activities.
   - Practiced frontend design, backend scripting, and basic web application development.
3. **Object Detection System**
   Arduino / Microprocessor and Embedded System project.
   - Developed an object detection system using Arduino, microcontroller, and sensors.
   - Practiced sensor-based detection logic and basic embedded system operation.
   - Gained practical understanding of hardware-software interaction.
4. **Password Based Door Lock System**
   Arduino / keypad / servo motor / LCD.
   - Developed a password-based door lock system using Arduino, keypad, servo motor, and LCD.
   - Implemented password verification logic for access control.
   - Practiced circuit design, input handling, and microcontroller-based system operation.

RESEARCH WORK

1. **AI-Driven Precision Medicine: Predicting Cancer Drug Response Using Pharmacogenomic Features and Machine Learning Models**
   Unpublished Research Work
   - Worked on a machine learning-based research project focused on predicting cancer drug response using pharmacogenomic features.
   - Explored the application of AI and machine learning models in medical data analysis and precision medicine.
2. **Diabetes Prediction and Recommendation System Using Machine Learning**
   Unpublished Research Work
   - Developed a machine learning-based system for diabetes prediction using health-related data.
   - Worked with data preprocessing, model training, prediction, and recommendation-based decision support.
